Safer Field Research in the Social Sciences A Guide to Human and Digital Security in Hostile Environments

Bucerius Fellow **Ilyas Saliba** and his co-authors published a guide for a safer fieldwork

How did the book come about?

Ilyas Saliba: Four years ago on fieldwork mission for my PhD research in Cairo I was searching for resources and best practices on safe fieldwork under the impression of the gruesome murder of our colleague Giulio Regeni in Egypt. However, I was surprised to find very little to nothing in the social science literature on this issue. Many discussions and conversations over the following years with Kevin Köhler, Jannis Grimm, Ellen

Analysing Change

Bucerius Fellow **Ilyas Saliba** and his co-authors about Academic Freedom Index:

“Academic freedom is fundamental to scientific progress, the pursuit of knowledge, research collaboration, and quality higher education. Plenty of universities and states have committed to safeguarding academic freedom, yet it

Who is this book for?

Ilyas Saliba: Scholars planning to undertake fieldwork themselves, their supervisors & those teaching on fieldwork methods. Although geared towards a social science crowd much of the advice in the book is also useful for other disciplines, journalists or NGO staff.

What can I expect from the book?

Ilyas Saliba: After the introduction (1) the book is structured along the three phases of fieldwork:
 2) before the field with Sylvain Lefebvre, Daniel T.R. Masterson & Francesco Strazzari
 3) in the field with, Alessandra Russ, Emma Beals & Osama Diab
 4) after the field with Mara Revkin, Sarah E. Parkinson & Florian Kohstall
 Followed by 2 chapters on: 5) digital security and data protection (6) with Morana Miljanovic, Vasillis Ververes & Kersti Ruth Wissenbach

It concludes discussing the role of universities & funders in fieldwork safety (7).

From the introduction:

We need a change of perspective. Not all dangerous research is necessary, or worthwhile; research is not

community is racing to respond to the novel coronavirus Sars-CoV-2. Academics, both inside and outside of universities and in an extraordinarily broad range of disciplines, are playing a vital role in addressing the epidemiological, economic, political, and cultural dimensions of the response to the crisis, as they will in the eventual recovery and restoration of essential functions and services."more

MENA Workshop 21 - 22 November 2019

In cooperation with the German Institute for International and Security Affairs (SWP), Berlin, we organize the next "Trajectories of Change" workshop dealing with transformation processes in the Middle East and North Africa.

5th Students Conference

team's physical and mental well-being over 'sexy' research. Being a maverick and engaging in research despite harsh realities should never be a mark of success. On the other hand, field research is almost never risk-free. Given the unpredictable nature of some of the risks we will discuss in this book, striving for completely safe field research risks imposing too many restrictions on what researchers can do. By contrast, a fundamental conviction motivating this volume is that safer research is possible. Responsible researchers should thus assess when fieldwork is too risky, understand when the benefits do outweigh the costs, and take all measures to keep everyone involved as safe as possible. We advocate an approach of risk management as a middle way which avoids both an overly restrictive approach or the risk-embracing attitude encouraged by a resilience perspective.

Field Trip to Tunis

Tunisia 2018 - Challenges
for the State, Economy
and Society

16 to 22 September 2018

The field trip seeks to strengthen the collaborative aspect of "Trajectories of Change". We want to promote both empirical research based on intensive fieldwork and theoretical reflection. Comparative inputs to the exploration of the Tunisian transformation in the field are highly welcomed.
